

I have been an xm listener for 3 years and I want to be able to get Traffic and Weather on my radio. There should be no restrictions on decent transmission sent over the air. I pay every month to listen to the stations that I like and the National Association of Broadcasters should not be able to limit me as to what I want to listen too.

I respectfully ask you to reject the NAB's petition 04-160.

Thank you for your time,

Thomas L. Bates
